## Take Charge of Your Health

Contact Us at +65 81023838 to find out  
more. Book Your Appointment Today

We believe that cancer screening should be done by specialist trained oncologists who are most experienced in this field. Hence, our cancer screening programs have been specially curated by our specialist oncologists to ensure that only the most relevant and detailed screening tests are selected for you. We will partner with you to address your specific needs and concerns as well as continue to monitor your health to ensure that there are no missed opportunities in the future.

## GENERAL COMPREHENSIVE CANCER SCREENING TESTS

ALL our packages include the following tests:

- Medical and Family History
- Physical Examination
- Body Mass Index (height & weight)
- Blood pressure
- Heart rate
- Oxygen saturation

## CANCER SCREENING & MARKER PANEL

- FBC (Colorectal, Blood cancers)
- CA153 (Breast cancer)
- CA 125 (Ovarian cancer)
- CEA (Colorectal cancer)
- CA 19-9 (Pancreas cancer)
- AFP (Liver cancer)
- LFT (Liver function test)

## OUR CANCER SCREENING PACKAGES

### CANCERCARE PLUS

Thorough screening tests for the most common cancers affecting women with specialised investigations for your peace of mind.

### CANCERCARE PREMIUM

This package serves to provide further enhanced investigations to screen for even more cancers and provide you with greater assurance that your health is protected.

### CANCERCARE + WELLNESS DELUXE

Our most comprehensive and precise package provides you with the gold standard investigations to screen for most cancers to ensure that you can live your life to the fullest.

Contact us at 81023838 to find out more about the difference between our screening packages.

Customised screening packages & genetic screening can be arranged upon requests.

## GENETIC SCREENING

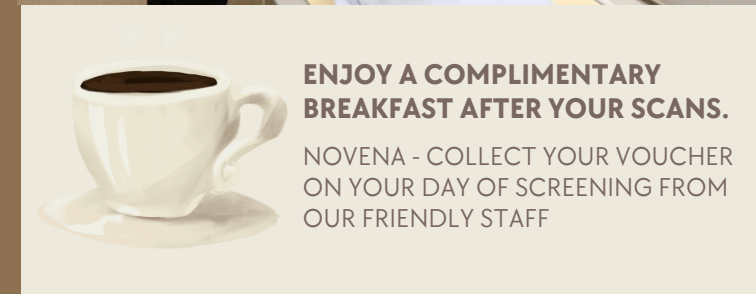

Patients who are concerned that they may be at a higher risk of cancer can opt for our comprehensive genetic cancer screening for greater peace of mind. Our genetic screening test decodes 67 cancer genes associated with 9 common hereditary cancers and 11 cancer syndromes.
